DETAILED ACTION

Claims 1-9 are pending in the application and are currently under prosecution.

Please Note: In an effort to enhance communication with our customers and reduce processing time, Group 1640 is accepting a Fax Response for Written Restriction Requirements. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-6, drawn to a purified protein, DETH.

Group 2, claim(s) 7, drawn to a purified nucleic acid encoding a protein, DETH.

Group 3, claim(s) 8, drawn to an antibody specific for DETH.

Group 4, claim(s) 9, drawn to a method of inducing apoptosis comprising expressing DETH in a cell

The inventions are distinct, each from the other because of the following reasons:

A national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. Unity of invention is fulfilled only when

Art Unit: 1642

there is a technical relationship among the inventions involving one or more of the same or corresponding special technical features which define a contribution over the prior art. If there is no special technical feature, if multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application will be considered as the main invention in the claims, see PCT article 17(3) (a) and 1.476 (c), 37 C.F.R. 1.475(d).

The inventions listed as Groups 1-4 do not relate to a single inventive concept under PCT Rule 13.1 because under PCT Rule 13.2 they lack the same or corresponding special technical features for the follow reasons

The technical feature linking groups 1-4 appears to be purified proteins having at least 80% identity to DETH (SEQ ID NO:2). However, Deen *et al.* (US Patent Database, Patent No. 6013476, filed October 1997) teach a purified protein having an amino acid sequence having at least 80% identity to DETH.

Therefore, the technical feature linking the inventions of Groups 1-4 do not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

Accordingly, Groups 1-4 are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept and restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1642

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
